

Yonsei University - HKUST exchange event

(ocean modelling, air-sea interaction, mixed layer
turbulence, mesoscale turbulence)

Friday 2nd October 2026

Sponsors

We would like to thank

- Global Knowledge Network seed fund (HKUST-Yonsei University)
- RGC/UGC through funding to HKUST
- Department of Ocean Science

for financial support towards this event.

Timetable (Friday, 2nd October)

≈1200–1330	Lunch at UniBistro, HKUST		
1330–1335	Welcome remarks		
1340–1400		Hajoon SONG Yonsei	Air-sea modeling laboratory at Yonsei University: Recent progress and research highlights
1400–1420		Min CHAE Yonsei	Sensitivity of NEMO ORCA2 simulations to varied mesoscale eddy parameterizations
1420–1440		Junghee YUN Yonsei	Mesoscale eddy controls on mixed-layer responses in high-resolution climate simulation
1440–1500		Hyojun SEONU Yonsei	LES insights into vertical mixing and particle export in the ocean mixed layer
1500–1510	Break		
1510–1530		Qing LI HKUST-GZ	Langmuir turbulence in shallow water: Transition to marginal instability and an analogy with rotating plane Couette flow
1530–1550		Julian MAK HKUST	Overview of GEOMETRIC and the splitting algorithm
1550–1610		Yan WANG HKUST	On baroclinic Neptune effect: up-gradient eddy fluxes and negative GM coefficient
1610–1630		Yue WU HKUST	Ice-Frictional eddy dissipation in the Arctic ocean
1630– whenever	Further discussions		
1730– whenever	Drinks/dinner, TKO (DHYC, maybe preceded by Frites)		

Useful Information

Talks will be held in **classroom 4472 (lift 25/26)** of the Main Academic Building. Look for the Passion cafe, then head up to fourth floor (where the physics department is located).

Light refreshments will be provided during the **breaks**; some of us might go down to the Passion cafe.

The **lunch** will be somewhere on campus, while the dinner will be off campus in Tseung Kwan O (TKO). For those arriving on Wednesday, a dinner could be arranged; please get in touch at jclmak@ust.hk.

How to get to the HKUST

Starting from Hong Kong International Airport, would first recommend getting an Octopus card (from a 7-11 or otherwise; need to put in a HKD 50 deposit), or there is also the Octopus app unless you plan to only use a taxi. Then, starting from the airport, you can either get

- a red taxi (~ HKD 350-400, cash is best),
- the A29 or E22A bus (I recommend the A29 because it winds around less) to Hang Hau or Tseung Kwan O, and make your way to the associated MTR station,
- the Airport Express which is part of the Mass Transit Railway (MTR), get to the end probably, then either get to Choi Hung station (on the green line) or Hang Hau station (on the purple line).

If you are at Hang Hau MTR station (purple line), take either exit and look for the number 11M minibus (terminal station at HKUST north gate) or the 11 minibus (stops at HKUST south gate, more complicated, less frequent), or a taxi (~ HKD 50, both red or green taxis, but red taxi drivers have been known to refuse...)

If you are Tseung Kwan O MTR station (purple line), you can either take one stop to Hang Hau MTR and do as previous paragraph, or look for the 792M bus (but that bus comes every 20-30 mins), or a taxi (~ HKD 60-70, will probably only see red ones).

If you are at Choi Hung MTR station, take exit C and look for the number 11 minibus or the 91 or 91M bus, which will stop at HKUST north gate, or get a taxi (~ HKD 70-80, will only see red ones).
